### **What injury happened to your knees that stopped you from running and skiing ?**

The problem with my knees was wear and tear over a long time which I ignored, until I was told by an orthopaedic surgeon that if I did not alter my lifestyle I would need knee replacements within a year.

### **Like myself you must have seen many runners who started with the club at our Wednesday Harriers group, many of whom had very little confidence in their running abilities when they first came and introduced themselves, then go on to race 10k's, Half Marathons, Marathons, Cross Country events etc. This must make you very proud?**

When Martin, Sally, Pam and myself started the Harriers we felt that there was gap between people out running and the traditional athletic club, The Harries filled that gap by offering the opportunity to improve and gain confidence in their running, this has progressed to runners joining the club . Now we see runners at the Harriers who want more than just a weekly Park Run joining us on a Wednesday evening. Again if you look at the results these days a lot of our club members have come up through the Harriers or Park Runs. We have had many success a few disappointments over the years. This has given me a lot of satisfaction over the years seeing runners obtaining their personal goals.

I will be back making the tea on a club night once we get back to the new normal life.
